

Chicken IgY(with colloidal gold conjugated)

Cat. No.: E-ELC-006 Size: 1mL/5mL/10mL

Product Information

Conjugation:	Colloidal gold
Source:	Egg yolks
Application:	Lateral Flow (Rapid Test)
Formulation:	Liquid
Purity:	> 90 % as determined by SDS-PAGE
Storage Buffer:	10mM PBS, pH 7.4, with 0.02% sodium azide
Storage:	Store at 2-8°C for 2 months

The Chicken IgY has been conjugated with colloidal gold and is able to be applied as the control in COVID-19 Rapid Test Card development. It is recommended to use Elabscience's related products for this assay. Below is the corresponding product list.

Cat.NO.	Product name
E-ELC-002	Recombinant SARS-CoV-2 N Protein (with colloidal gold conjugated)
E-ELC-003	Mouse anti-human IgG monoclonal
E-ELC-004	Mouse anti-human IgM monoclonal
E-ELC-005	Goat anti-chicken IgY polyclonal
E-ELC-008	Buffer for Rapid Test development(02)
